
[Tomorrow 1.11] State of American Business 2022

U.S. Chamber Events 8:19 PM
to me

U.S. Chamber of Commerce

State of American Business 2022

Tuesday | January 11, 2022 | 11 AM ET

We are excited you will be joining us tomorrow for the U.S. Chamber of Commerce's State of American Business 2022.

Here's What to Expect:

- **U.S. Chamber President and CEO Suzanne Clark will articulate that competition** — an essential force that drives achievement, innovation, and progress — is shaping a better future for all of us in her first State of American Business keynote address.
- **Plus, we will hear from leaders in the business community including:**
  - **Dr. Albert Bourla,** Chairman and CEO, Pfizer in conversation with **Dr. Michelle McMurry Heath,** President and CEO, Biotechnology Innovation Organization.
  - **Carol Tomé,** CEO UPS in conversation with **Chris Clark,** President and CEO, Georgia Chamber of Commerce.
- A conversation with **U.S. Senators Susan Collins** (Maine-R) and **Jeanne Shaheen** (New Hampshire-D), moderated by **Neil Bradley,** Executive Vice President, Chief Policy Officer and Head of Strategic Advocacy U.S. Chamber of Commerce.

Thank you to everyone who joined us for **NOW + NEXT: Cyber Conference**. **[Click here to replay the webinar.]**

In the first portion of this conference, South Carolina's Governor, **The Honorable Henry McMaster,** and the CEO of the South Carolina Chamber of Commerce, **Bob Morgan**, kicked off the event. **General Keith Alexander**, Founder and co-CEO, IronNet, former Commander, U.S. Cyber Command, and former Director, National Security Agency, and **Lt. General Bruce Crawford**, U.S. Army (Ret.), Senior Vice President, Strategic Development, Critical Mission Solutions, Jacobs and former Chief Information Officer, U.S. Army, engaged in a meaningful discussion about the need for public and private organizations to form a collective defense in cyberspace to share information, hunt, identify and stop threats together. The following panel discussed cybercrime-as-a-service and ransomware, which was moderated by **Shannon Vavra**, a reporter at CyberScoop, and included a group of expert government and industry speakers, including **Nitin Natarajan**, Deputy Director, Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security, **Raj Samani**, Fellow, Chief Scientist, McAfee, **Megan Stifel**, Executive Director, Americas, Global Cyber Alliance, and **Harry W.**, Technical Director for Incident Management, National Cyber Security Centre. **Chris Herron**, Territory Manager – South Carolina, Check Point Software Technologies introduced our final panel, which focused on the cyber ecosystem in the Central Savannah River area and included **Kim Christ**, Director, Technology and Cybersecurity Initiatives, South Carolina Council on Competitiveness, **Scott Cooper**, Chairman, Edgefield County Council, **Dr. Sandra J. Jordan**, Chancellor, University of South Carolina Aiken, **Will Williams**, President and CEO, Aiken Economic Development Partnership, and **Tom Scott**, Executive Director, CyberSC

The program featured keynote remarks from **Kiersten Todt**, Managing Director, Cyber Readiness Institute, who was in conversation with **Karen Painter Randall**, Attorney, Cyber Law Task Force, University of South Carolina, to discuss small business cybersecurity, as well as **The Honorable Tom Young Jr.**, State Senator of South Carolina, who provided remarks on proposed cyber economic legislation.

Registration is opening soon for the Chamber's NOW + NEXT: Cyber Essentials Webinar

- We look forward to welcoming you to our upcoming event on Tuesday, June 29th. The Chamber will send event details and the registration link in the coming weeks.

Media Roundup:

Python Programming Numerical Analysis/Machine Learning Series
By Constantinos Doskas - ISSA-NOVA Member - MS Information Assurance
This article is part of a series of articles which deal with topics in programming using the Python programming language. In the previous article we solved basic systems of equations and touched on the basis of Agile Methodology. In this article we are going to introduce scipy, a module which provides algorithms that handle differential equations, statistics, interpolation, and many other types of problems.

Cybersecurity remains at the top of every organisation's agenda. Join our opening keynote to hear how Google Cloud's unique capabilities and expertise can help organisations, large and small, in the public or private sector, address today's most prominent security challenges and imperatives:
* Zero Trust
* Securing the Software Supply Chain
* Ransomware and other emerging threats
* Cloud governance and Digital Sovereignty
Whether you use our trusted cloud for digital transformation, or continue to operate on-premise or in other clouds, you'll learn how we can help you be safer with Google.

US Cyberspace Solarium Commission

by Easytech4all.net

U.S. Cyberspace Solarium Commission Webinar:

Accomplishments and Next Steps for U.S. Cyber Policy

Wednesday, March 30, 2022
12:30 - 2:00 p.m. EST

Join the U.S. Chamber of Commerce for a webinar on the U.S. Cyberspace Solarium Commission (CSC)'s work and accomplishments on **Wednesday, March 30 at 12:30 p.m. ET.** Established in the 2019 National Defense Authorization Act, the Commission worked to develop strategic approaches to to defend the United States in cyberspace.

The National Defense Authorization Act of 2021 reauthorized the Commission and enacted 25 of its recommendations, including the installment of a National Cyber Director, the establishment of the Joint Cyber Planning Office within the Department of Homeland Security, and the creation of biannual national cyber exercises. The Commission disbanded in December 2021, having achieved many of its objectives to defend U.S. cyber interests, but leaving a great deal of work to be done.

This webinar will highlight the Commission's work, its impact on U.S. defense priorities, and the challenges that remain. Congressman James Langevin (D-RI), Commissioner, will provide remarks on the Commission's accomplishments; Mark Montgomery, former Executive Director of the Commission, will reflect on its work and the priorities of Cybersolarium.org; and J. Chris Inglis, National Cyber Director, will provide perspectives on the path forward.

Danish, the Cyber Security Digital Summit For: SASE is here!

Seth Adler Yesterday
to me

Hi Danish,

As you registered for Cyber Security Digital Summits in the past, I wanted you to be the first to know that we've added some exciting new speakers to our 2021 Online Event (17 - 18, February).

Cyber Security is as critical as ever, but the current IT security environment demands more. This year's online event will guide you through Real-time Zero Trust Access, Approaching Edge Threat Intelligence, The Infinite Perimeter Securing IoT, Threat Hunting on The Dynamic Edge – to help you build and implement a solid cyber security strategy across the enterprise.

Some of the industry experts that will share their strategic approaches this February:

Ellie Warner
Global Head, Cyber Training and Awareness

Martin Ingram
Product Owner, IAM Royal Bank of Scotland

Barry Magsanay
Global Head of Information Security & Americas IT Services Treasury Wine Estates Global

Parag Deodhar
Director - Information Security, Asia Pacific Major Global Apparel Manufacturer

Secure your place here: https://www.cshub.com/events-cyber-security-digital-summit-secure-access-service-edge-apac

Kind Regards,

Seth Adler
Editor in Chief

Hi Danish,

We are excited to give you free **100% online** access to a series of inspiring sessions and thought-provoking discussions happening at the top level in the first ever **Virtual Intelligent Automation Exchange**!

Join us next week on **September 23 - 24** to hear from senior level automation leaders, make new industry connections and explore practical strategies to help you:

- Build your organizational framework to capitalize on Artificial Intelligence opportunities
- Strategize automation ready for scale, build capabilities and embrace change to achieve holistic digital transformation
- Review existing business models, project timelines and budgets to create a more flexible, cost efficient automation strategy

REGISTER YOUR FREE PASS

Our Keynote Speakers Include:

EFENSE INTELLIGENCE AGENCY

Brian Drake
Director of Artificial Intelligence
Defense Intelligence Agency

Join us for the Main Session of the CrowdStrike Asia Virtual Summit.

This session is comprised of:
- Welcome Message from Jagdish Mahapatra,...

Apr 08 2021 11:30 am | 135 mins

Dear Easytech4all,

After 20 AI experts and leaders joined us at our 7th April CognitiveVirtual from Mexico, United States, Spain, Israel, Germany, Canada, Switzerland, England, Sweden, France, Malta, and Austria, we are happy to send you some key facts & figures as well as the event recordings in this email - feel free to share it with your network.

More inputs will be distributed in our upcoming Cognitive RoundUp - Weekly AI Newsletter - in the next two weeks. Stay tuned, keep connecting, and see you at our next CognitiveVirtual - maybe even on stage? See **call for speakers below!** Let us know what you have to share with your AI peers in the global ecosystem, across industries.

Why Wait? Act Now! And Share for Success!

Join us tomorrow to learn how small businesses can better protect their network. This webinar is designed to turn strategy into business action plans for risk mitigation and incident response. Register here: https://lnkd.in/e7pbRnn

Alejandro Mayorkas, the Secretary of the U.S. Department of Homeland Security, will open the discussion followed by a fireside chat. Hear firsthand why ransomware as a national security threat and why DHS identified fighting the rise of ransomware as a priority.

The webinar starts at 1:30 pm ET on Wednesday, May 5.

NOW+NEXT: Countering Ransomware Webinar Replay + Join us at our Upcoming Event!

Roberti, Christopher 1:53 AM

Thank you to everyone who joined us for **NOW + NEXT: Countering Ransomware.** **Click here to replay the webinar.**

In the first portion of yesterday's event, **Secretary of Homeland Security Ali Mayorkas** discussed with me why ransomware is one of his top priorities and the focus for his **first sprint** saying, "The threat is real. The threat is upon us. The risk is to all of us." Small businesses, who comprise the backbone of the American economy, "must be able to defend [themselves] to the fullest extent possible...and it is not a matter of eliminating ransomware, it's a matter of, quite frankly, defending against the attackers." Secretary Mayorkas pointed to the Cybersecurity and Infrastructure Security Agency's **ransomware guide** as a resource for businesses to improve their cyber risk management.

The second part of the program focused on business resilience and included a panel of U.S. government and industry experts, including **Pete Marta**, a partner with Hogan Lovells, **Eric Goldstein**, Executive Assistant Director, Cybersecurity Division, CISA, **David M. Smith**, Special Agent in Charge, Criminal Investigation Division, Secret Service, and **Lisa Wallace**, Area Vice President, US Public Sector Security Sales Program, Splunk.

High-Scoring Audience Q&A:

- What are the best tools available right now to detect and prevent Ransomware attacks? Check out these free resources:
    - Cyber Readiness Institute: Ransomware Playbook or their White Paper on Small Business Cybersecurity Recommendations for the Biden Administration
    - Secret Service: Preparing for a Cyber Incident - A Guide to Ransomware
    - Global Cyber Alliance's Small Business Toolkit.
- To which Law Enforcement agency do I report a ransomware incident to? There are several options for reporting a cyber incident to the Federal Government and you should review this guide before doing so.
    - **CISA.** Businesses can report a cyber incident to either the US-CERT or a Regional Office
    - **U.S. Secret Service.** The U.S. Secret Service has a helpful Contacting Law Enforcement Guide. Victims can report an incident to their nearest Field Office and ask to speak to an agent with the Cyber and Fraud Task Force.
    - **FBI.** The Federal Bureau of Investigation (FBI) has several resources to support

  - **CISA.** Businesses can report a cyber incident to either the US-CERT or a Regional Office
  - **U.S. Secret Service.** The U.S. Secret Service has a helpful Contacting Law Enforcement Guide. Victims can report an incident to their nearest Field Office and ask to speak to an agent with the Cyber and Fraud Task Force.
  - **FBI.** The Federal Bureau of Investigation (FBI) has several resources to support ransomware victims, including a NCIJTF Fact Sheet. Organizations can report a crime to either the Internet Crime and Complaint Center (IC3) or an FBI Field Office.
- What does OFAC's Ransomware Advisory Means for U.S. Companies? On October 1, 2020, the U.S. Treasury Department's Office of Foreign Assets Control (OFAC) published an advisory that reiterates the prohibition against U.S. businesses and persons conducting business or paying funds to any person on the "Specially Designated Nationals and Blocked Persons" list. Organizations developing their incident response plan should consult counsel to review their legal and regulatory obligations, including OFACs.

Live Poll Results:

- **93%** of respondents consider ransomware an existential threat to their business.
- **88%** of respondents do not think their organization will pay a ransom demand.
- **98%** of respondents will report a ransomware incident to law enforcement, and **71%** know which agency they will report to.

Media Roundup:

- DHS secretary warns ransomware attacks on the rise, targets include small businesses (ABC News)
- Biden administration, Congress unite in effort to tackle ransomware attacks (The Hill)
- DHS set to launch its 'most significant hiring initiative' as part of cyber workforce sprint (Federal News Network)
- DHS Chief: Ransomware Leads DHS Cyber Sprints Due to Urgency (MeriTalk)
- DHS chief Mayorkas cites CISA tools for small businesses heavily targeted by ransomware attackers (Inside Cybersecurity)

U.S. CHAMBER OF COMMERCE

On **Tuesday, May 25, 2021**, at **9:00 a.m. (Eastern Daylight Time),** U.S. Chamber of Commerce, in partnership with the South Carolina Chamber of Commerce and CyberSC, will virtually host **NOW + NEXT: Cyber Conference**.

This conference was designed with both small and large businesses in mind. Broadband and information technology are powerful factors impacting new markets and increased productivity and efficiency. However, businesses need a cybersecurity strategy to protect both organizational infrastructure and customer data from growing cybersecurity threats. This event will teach businesses to mitigate cybersecurity risks to identify and prepare for potential threats. It will also provide a primer on cybersecurity's economic impact and how it can affect our state's infrastructure.

Speaker and Panel Sessions Include:

- Collective Cyber Defense
- Cybercrime-as-a-Service and Ransomware
- Cyber Business Cybersecurity

Click here to view the list of our expert government and industry speakers.

U.S. CHAMBER OF COMMERCE

Thank you to everyone who joined us for **NOW + NEXT: Cyber Conference.** Click here to replay the webinar.

In the first portion of this conference, South Carolina's Governor, **The Honorable Henry McMaster,** and the CEO of the South Carolina Chamber of Commerce, **Bob Morgan**, kicked off the event. **General Keith Alexander**, Founder and co-CEO, IronNet, former Commander, U.S. Cyber Command, and former Director, National Security Agency, and **Lt. General Bruce Crawford**, U.S. Army (Ret.), Senior Vice President, Strategic Development, Critical Mission Solutions, Jacobs and former Chief Information Officer, U.S. Army, engaged in a meaningful discussion about the need for public and private organizations to form a collective defense in cyberspace to share information, hunt, identify and stop threats together. The following panel discussed cybercrime-as-a-service and ransomware, which was moderated by **Shannon Vavra**, a reporter at CyberScoop, and included a group of expert government and industry speakers, including **Nitin Natarajan**, Deputy Director, Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security, **Raj Samani**, Fellow, Chief Scientist, McAfee, **Megan Stifel**, Executive Director, Americas, Global Cyber Alliance, and **Harry W.**, Technical Director for Incident Management, National Cyber Security Centre. **Chris Herron**, Territory Manager – South Carolina, Check Point Software Technologies introduced our final panel, which focused on the cyber ecosystem in the Central Savannah River area and included **Kim Christ**, Director, Technology and Cybersecurity Initiatives, South Carolina Council on Competitiveness, **Scott Cooper**, Chairman, Edgefield County Council, **Dr. Sandra J. Jordan**, Chancellor, University of South Carolina Aiken, **Will Williams**, President and CEO, Aiken Economic Development Partnership, and **Tom Scott**, Executive Director, CyberSC

The program featured keynote remarks from **Kiersten Todt**, Managing Director, Cyber Readiness Institute, who was in conversation with **Karen Painter Randall**, Attorney, Cyber Law Task Force, University of South Carolina, to discuss small business cybersecurity, as well as **The Honorable Tom Young Jr.**, State Senator of South Carolina, who provided remarks on proposed cyber economic legislation.

Registration is opening soon for the Chamber's NOW + NEXT: Cyber Essentials Webinar

[Master Class Recording] Ransomware: Attackers, Defenders, and FBI's Perspective

Ashley from Cato 5:51 PM

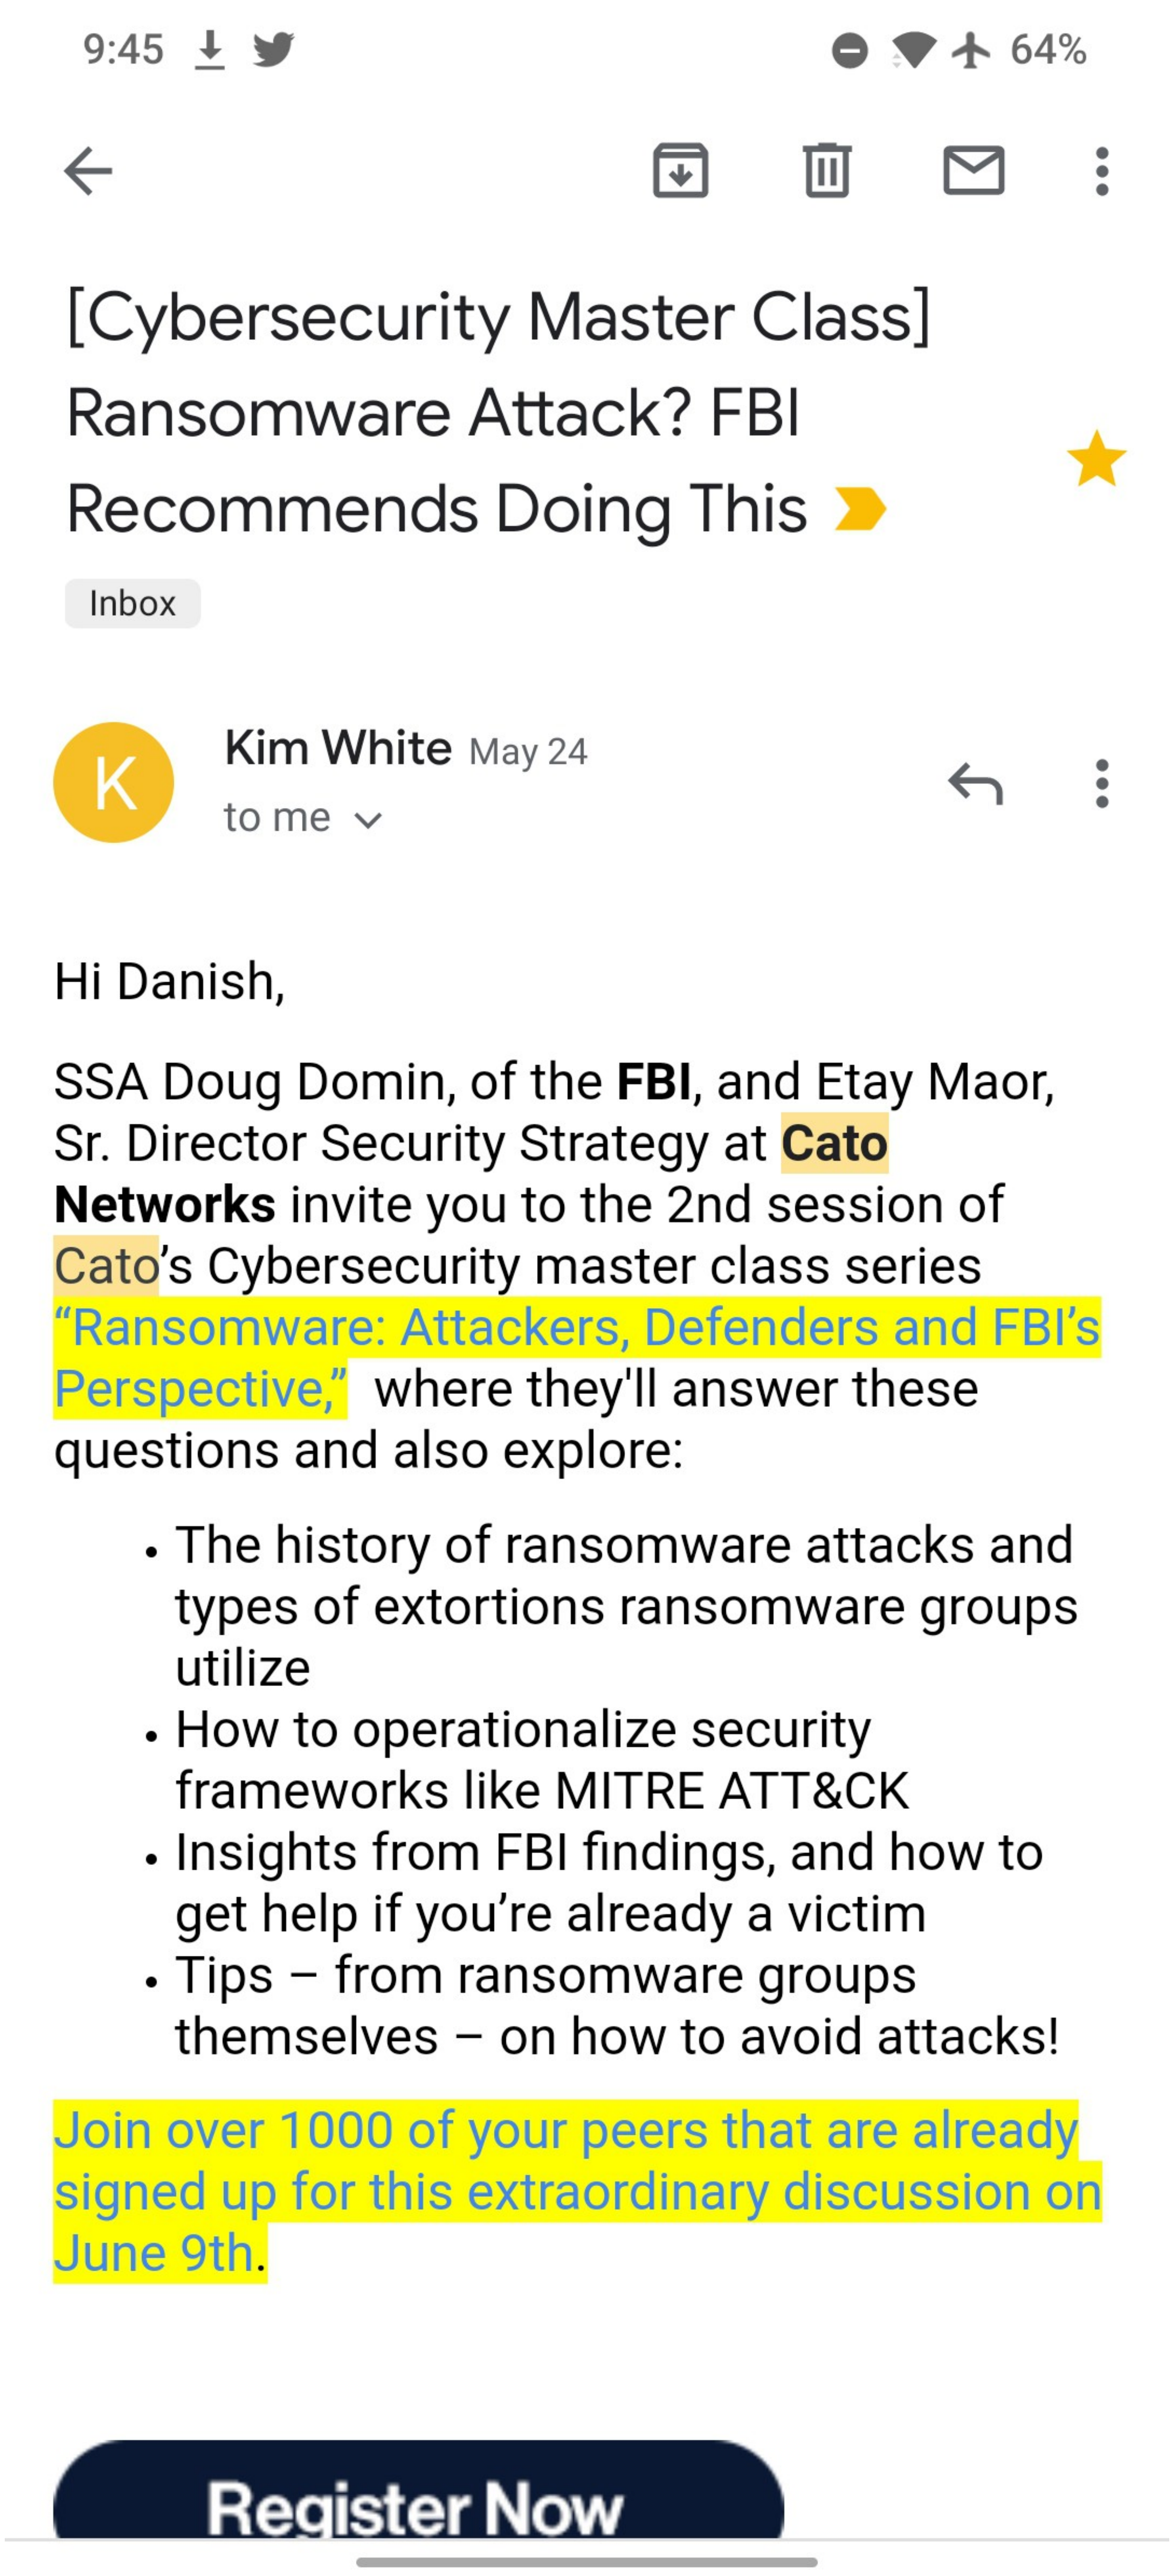
Hi Danish,

Thank you for your interest in Cato Networks' second master class session! To revisit the class click here.

During the session several tools and links were discussed, here are some of these resources:

1. MITRE ATT&CK Navigator https://mitre-attack.github.io/attack-navigator/ - stay tuned for a session dedicated to the MITRE ATT&CK framework and how to operationalize it on tactical and strategic levels!
2. The OFAC Ransomware advisory https://home.treasury.gov/system/files/126/ofac_ransomware_advisory_10012020_1.pdf
3. Need to report a crime - this is the IC3 website https://www.ic3.gov/
4. Need to locate your FBI office? https://www.fbi.gov/contact-us/field-offices

Our next webinar will cover Deep Fakes! We will start by reviewing the history of propaganda, misinformation and disinformation attacks (PSYOPS is not a new invention...) and dive into the world of deep fakes with a special guest - Raymond Lee, CEO and founder of FakeNet.AI and a Machine Learning researcher at UC Berkeley. We will cover attacks that already used deep fake technologies, how you can potentially identify deep fakes, how AI and ML are used to combat this threat, and more. We will also share videos and examples of everything from face swap



[Cybersecurity Master Class] Ransomware Attack? FBI Recommends Doing This

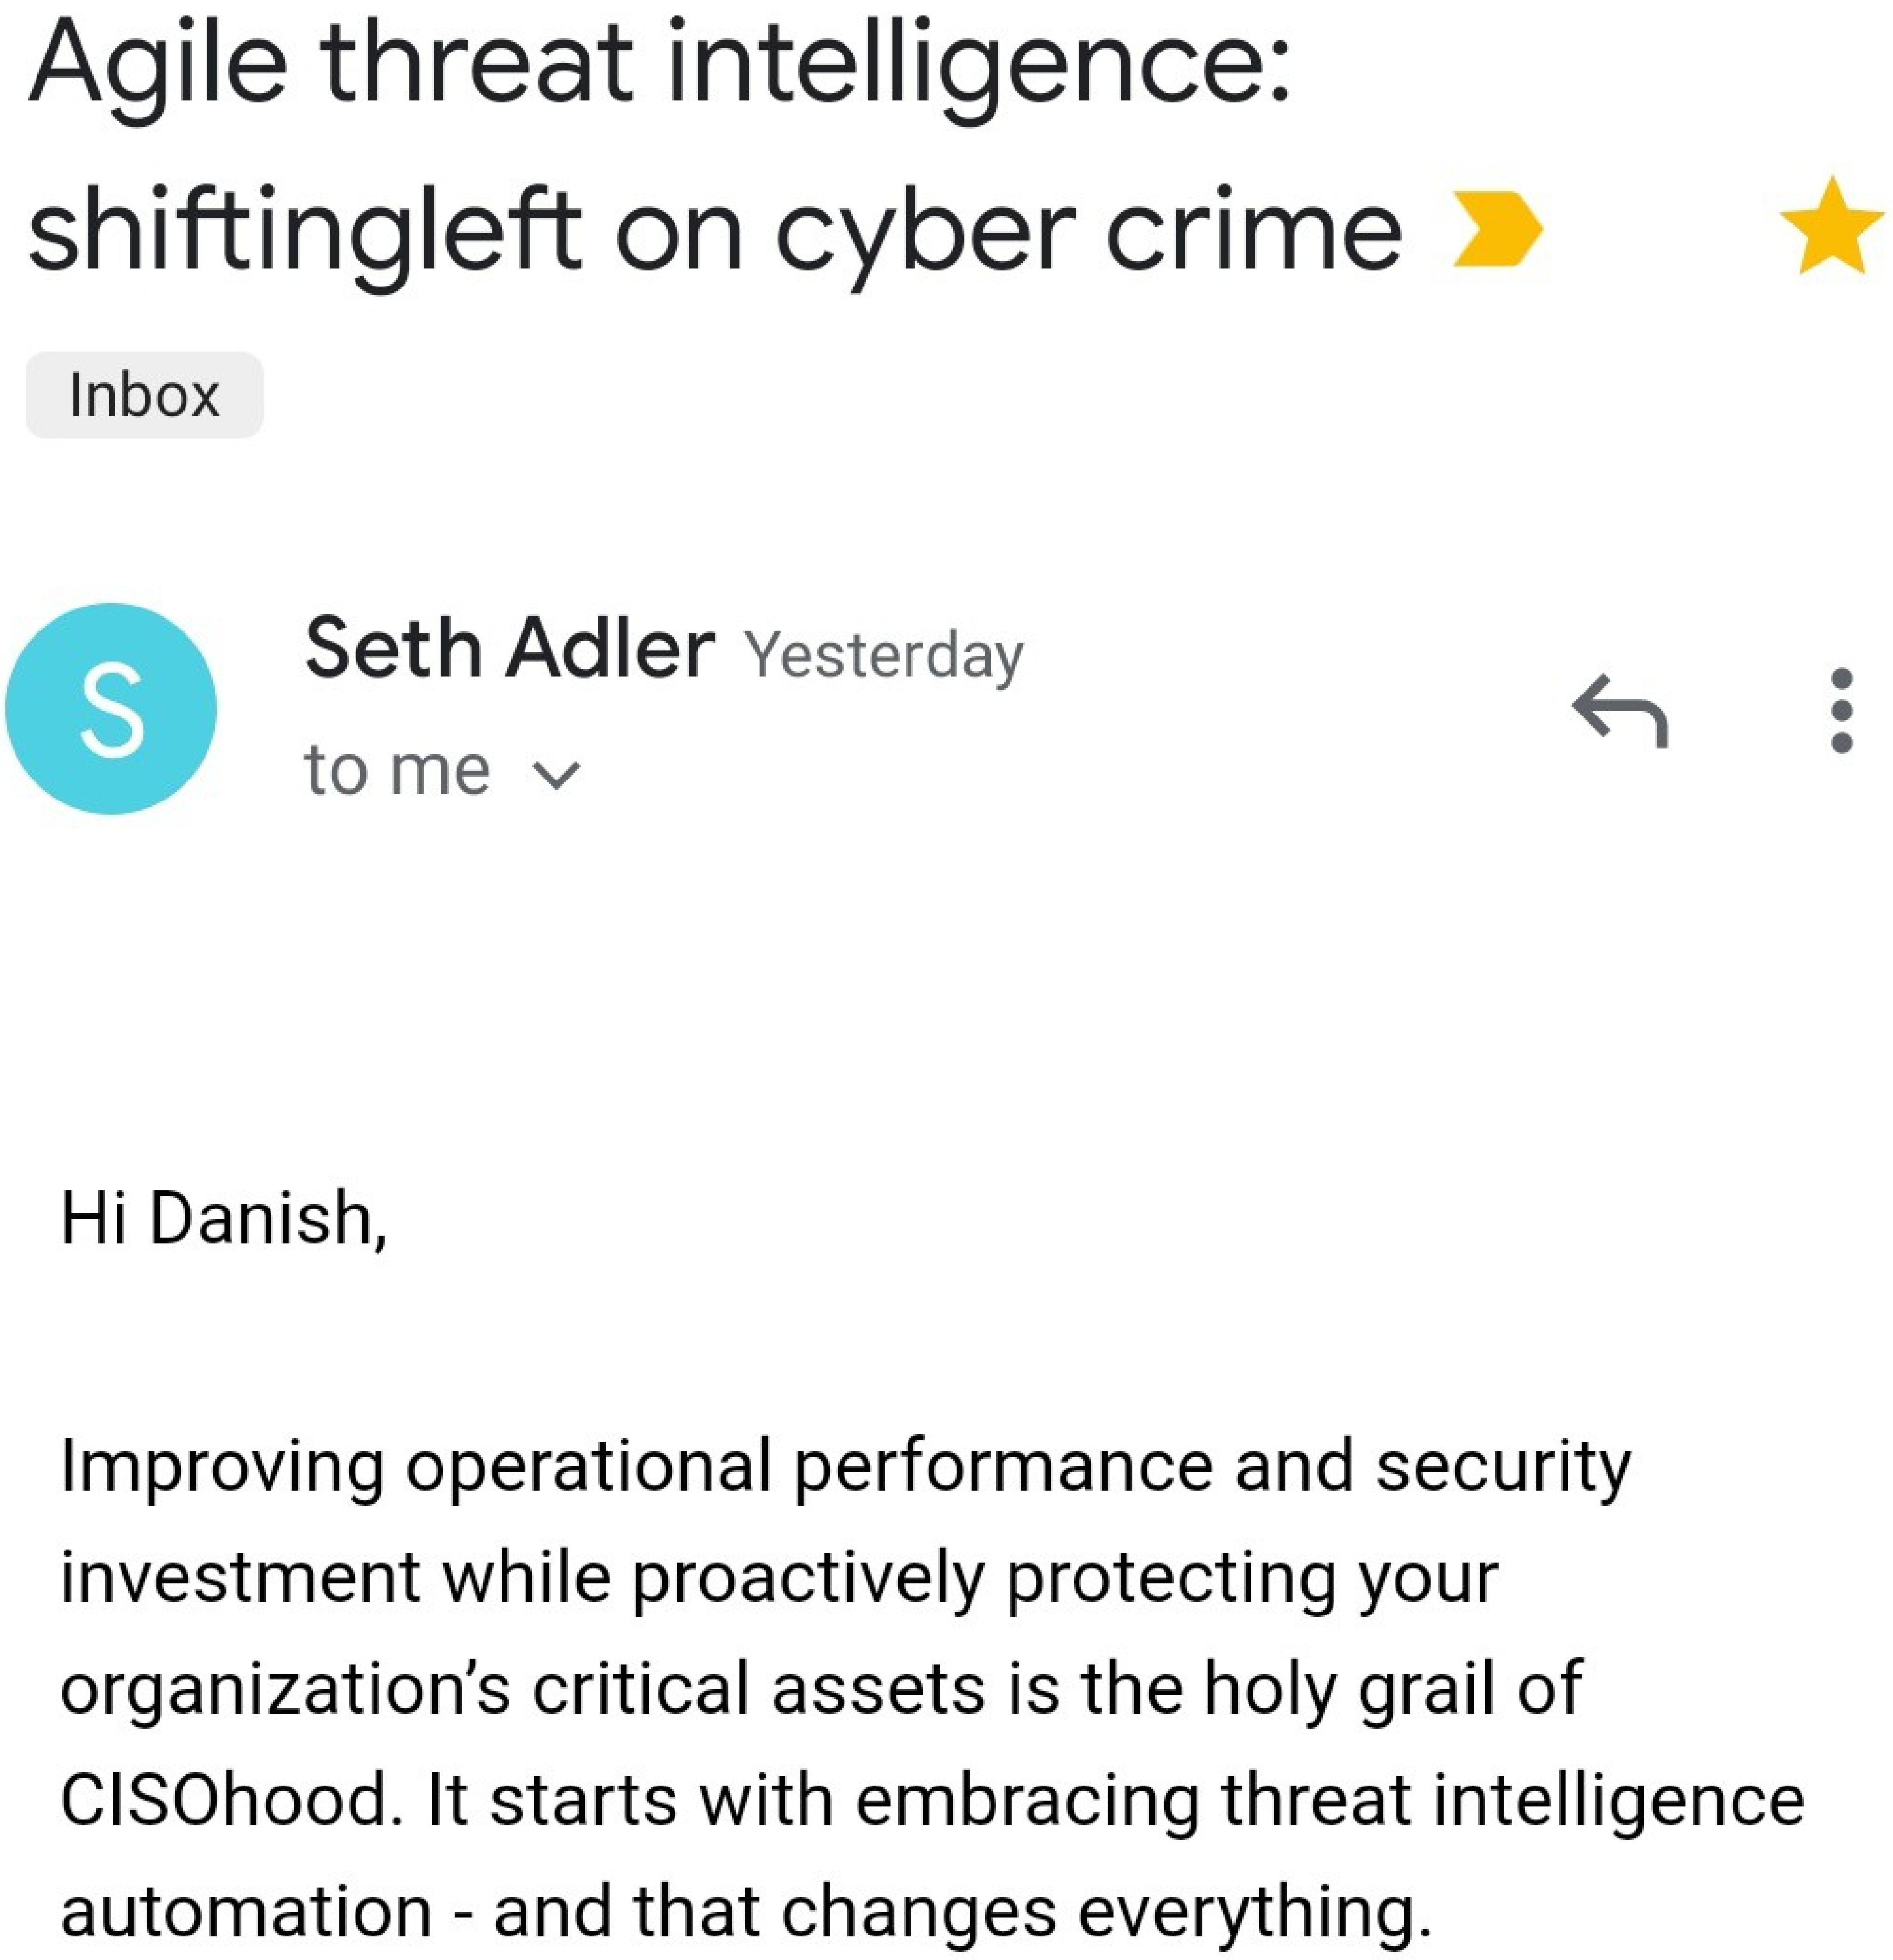
Kim White May 24
to me

Hi Danish,

SSA Doug Domin, of the **FBI**, and Etay Maor, Sr. Director Security Strategy at **Cato Networks** invite you to the 2nd session of Cato's Cybersecurity master class series "Ransomware: Attackers, Defenders and FBI's Perspective," where they'll answer these questions and also explore:

- The history of ransomware attacks and types of extortions ransomware groups utilize
- How to operationalize security frameworks like MITRE ATT&CK
- Insights from FBI findings, and how to get help if you're already a victim
- Tips – from ransomware groups themselves – on how to avoid attacks!

Join over 1000 of your peers that are already signed up for this extraordinary discussion on June 9th.



Agile threat intelligence: shiftingleft on cyber crime

Seth Adler Yesterday
to me

Hi Danish,

Improving operational performance and security investment while proactively protecting your organization’s critical assets is the holy grail of CISOhood. It starts with embracing threat intelligence automation - and that changes everything.

Danish,

Businesses need a cybersecurity strategy to protect both organizational infrastructure and customer data from growing cybersecurity threats, and business leaders play a critical role in ensuring that their businesses remain secure. This program is intended to provide business leaders with insights into how leveraging the Cybersecurity and Infrastructure Security Agency's (CISA) pillars of Cyber Essentials will provide a starting point to greater resilience through building an organizational culture of cyber readiness. The program will bring together key leaders from CISA to discuss the pillars and engage directly with the private sector.

Register today for the U.S. Chamber of Commerce's **NOW + NEXT: Cyber Essentials Webinar**, which will be held virtually on **Tuesday, June 29, 2021**, at **11:00 a.m. (Eastern Daylight Time)**.

Join our live hands-on SOAR workshop!

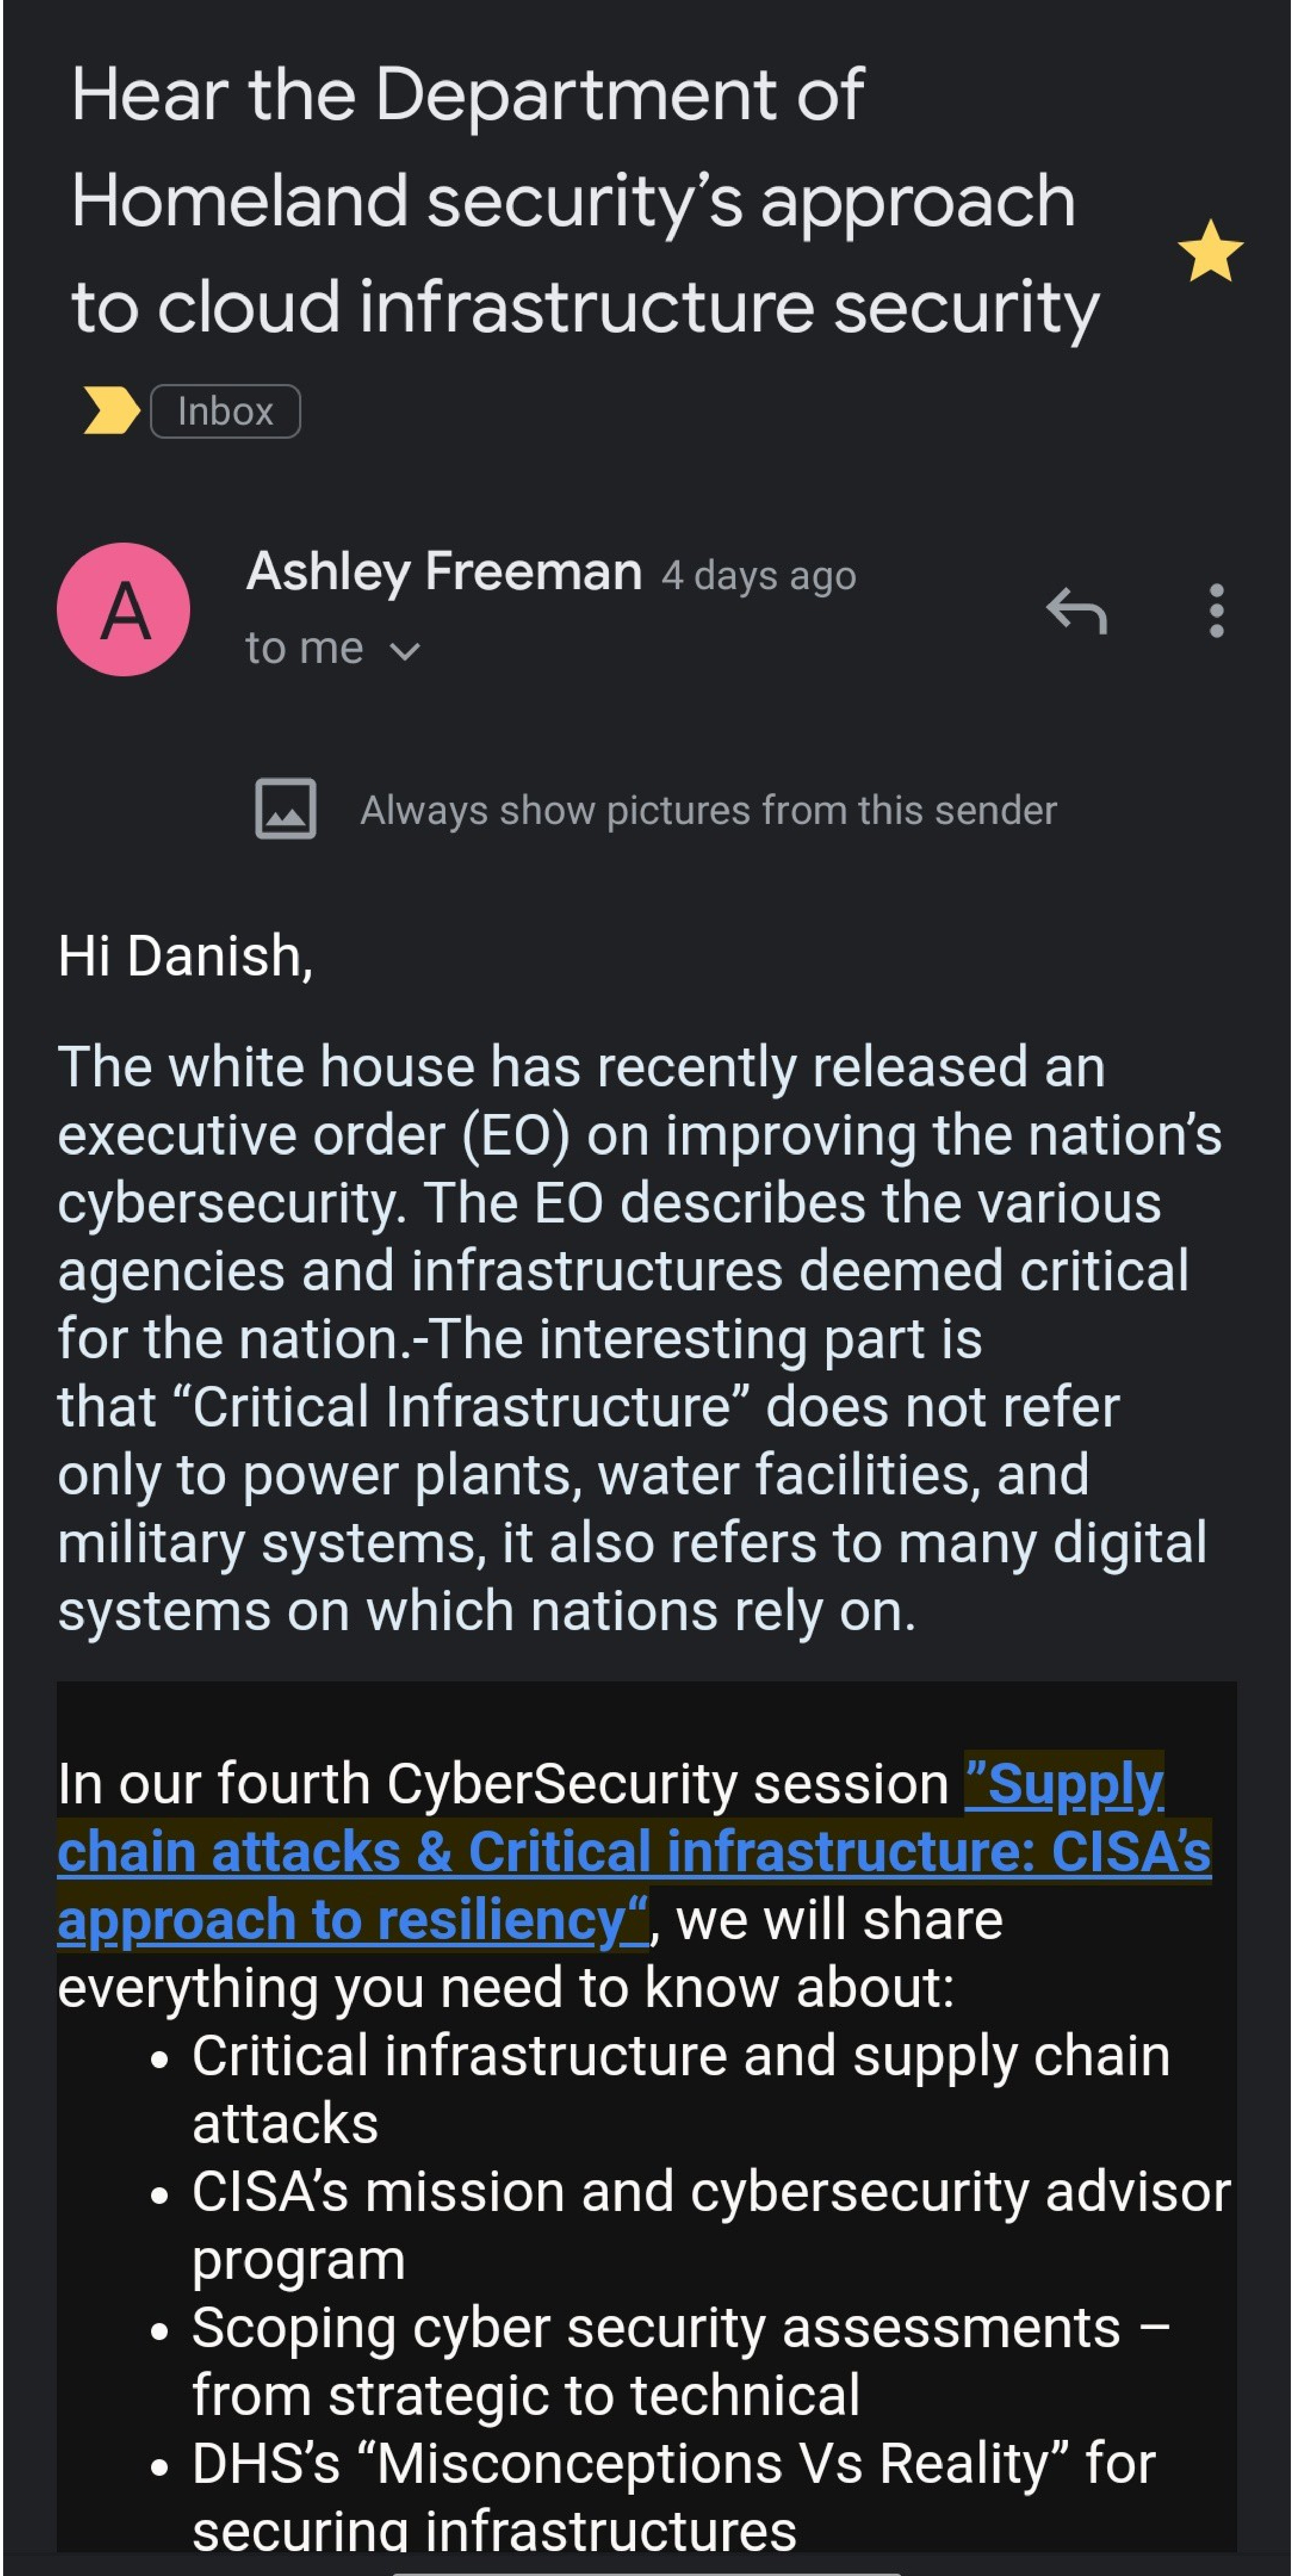
Caroline Adams, Sie... Yesterday
to me

Hi Danish,

You're invited to join our guided hands-on workshop and explore the power of SOAR with your very own instance of the Siemplify Security Operations Platform.

During this interactive experience, a Siemplify solutions engineer will personally walk you through how to:

- Build playbooks that drive repeatable, automated response processes.
- Investigate security threats more effectively with contextual mapping.
- Create reports for real-time SOC metrics and KPIs.



Hear the Department of Homeland security's approach to cloud infrastructure security

Ashley Freeman 4 days ago

Hi Danish,

The white house has recently released an executive order (EO) on improving the nation's cybersecurity. The EO describes the various agencies and infrastructures deemed critical for the nation.-The interesting part is that "Critical Infrastructure" does not refer only to power plants, water facilities, and military systems, it also refers to many digital systems on which nations rely on.

In our fourth CyberSecurity session **"Supply chain attacks & Critical infrastructure: CISA's approach to resiliency"**, we will share everything you need to know about:

- Critical infrastructure and supply chain attacks
- CISA's mission and cybersecurity advisor program
- Scoping cyber security assessments – from strategic to technical
- DHS's "Misconceptions Vs Reality" for securing infrastructures

Your Comprehensive Blueprint to Modern SecOps

Christopher Mitchell, Siemplify 7:53 PM
to me

E-Book

Blueprint of Modern Security Operations

Map out a new model for your SOC in the "anywhere" era with this complete and practical guide.

Hi Danish,

Security operations is at a critical juncture. Years of digital modernization, adversarial advancement and enduring talent deficits have given rise to an untenable situation.

The good news is the circumstance is not unsolvable. It only requires a rejiggering of familiar ingredients: your people, your processes and your technology — layering on a fresh, open-minded approach, to SecOps.

Read The Blueprint of Modern Security Operations to uncover:

- The economic, culture and design trends of a modern SOC.
- Why cloud-native security operations can unify SecOps & DevOps.
- How to utilize XDR, MITRE ATT&CK and Zero Trust in your SOC.

[Just Published!!] INSF Paper Finds Remote Work to Outlive Pandemic

INSA Communications 8:38 PM
to me

INSF White Paper Finds Remote Work to Outlive Pandemic

ARLINGTON, VA — The Intelligence and National Security Foundation (INSF) has released a new white paper focused on the COVID-19 pandemic impact on the intelligence and national security workforce. Underwritten by Avantus Federal, *The Future of the IC Workforce: The Promise and Limits of Remote Work Technology* summarizes key findings from INSF's three-part videocast series, which examined the shift to remote work in 2020; specifically, what worked, what challenges remain, and what opportunities lay ahead.

"The paper provides a number of recommendations for how we can reimagine the traditional IC work model and use lessons learned from the pandemic to build and grow a talented and diverse workforce," said Suzanne Wilson Heckenberg, president of INSF and the Intelligence and National Security Alliance.

Key findings include the need for government and industry to reduce over-classification of materials, embrace OSINT, implement agile leadership, and embrace emerging technologies including zero trust architecture.

New White Paper Addresses Insider Threat and Remote Work

Developed by INSA's Insider Threat Subcommittee, "Managing Insider Threats in a Remote Work Environment: Lessons Learned from the Pandemic" examines how the shift to remote work during the COVID-19 pandemic affected Insider Threat Programs (InTPs) and makes recommendations for mitigating problems created by continued widespread remote work.

WATCH THE WEBCAST

SANS Report: Closing the SecOps Skills Gap

Christopher Mitchell, Siemplify 7:46 PM

to me

Hello Danish,

According to a new SANS report the best way to resist frequent SecOps team attrition and turnover is through developing skills, investing in training, and giving employees the chance to tinker with new security tools and technologies.

This combination of employee skills building and engagement activities leads to staff longevity, which SANS has found to be the most accurate predictor of a “strong cybersecurity program” and a team’s ability to efficiently and effectively address emerging threats.

SANS recommends providing staff with:

- A well-defined career path to avoid “alert burnout” and demonstrate advancement.
- Sufficient funding for training and skills enhancement.
- Opportunities to play with and develop new security tools and techniques.

An enabling technology – security orchestration, automation and response (SOAR) – actually answers all of the factors typically representative of stable and long-standing SOC teams.

SOAR acts as a “force multiplier,” empowering SOC teams to eliminate manual, repetitive work and focus talent on higher-value, strategic initiatives requiring greater proficiency.

Moving Towards Zero Trust Architectures in Public and Private Environments

Date: September 28, 2021
Time: 1:00 PM to 2:00 PM (ET)

Assume breach. It might be one of the most memorable pieces of cyber risk advice following the December 2020 discovery of an ongoing supply chain attack by a sophisticated threat actor, likely Russian in origin. If you are running these software versions, assume breach and hunt for adversarial behavior. Full stop. From the Security Teams to Chief Information Security Officers, we know that the worries and concerns of significant business disruption from a cyberattack are on the minds of many. But there is a better way for organizations to manage security. That approach is zero trust.

While the concepts of zero trust are not new, shifting away from trusted, firewalled, or castled networks is unknown to most enterprises. Many organizations are struggling to integrate these concepts in an information technology modernization strategy focused on security. Zero trust architectures assume that malicious actors are both within and outside the enterprise and that security teams need to validate the connections between every user, device, application, and dataset. In addition, organizations will migrate operations to the cloud and employ automated endpoint detection and response (EDR) capabilities. Cloud migration

Thank you for joining us on Day One of CISA's 4th Annual Cybersecurity Summit!

Thank you for joining us today for the first day of our 4th Annual National Cybersecurity Summit! We hope you enjoyed hearing from these remarkable cyber leaders. For your convenience, today's recording and slides are available on the Day One webpage.

The Cyber Summit will continue over the next three Wednesdays: October 13, October 20, and October 27. Join us next week to learn more about The Collective Defense and the value of partnerships within .gov and other entities. The agenda for next week's session is now available.

A link will be sent via Eventbrite notifications to join Day 2 of the Cyber Summit the morning of the event at 9am ET. If you register after 9am ET, please visit https://www.cisa.gov/live.

As always, please contact us at CyberSummit@hq.DHS.gov if you have any questions. See you next week!

Cyber Security Summit 3:10 AM
to me

Connections are powerful. The value of our interpersonal connections became evident in 2020 as the pandemic changed the way we interact with colleagues, friends, and family. The proliferation of mobile devices and sensors in everyday items has created the most powerful network of interconnected devices imaginable. But with great power comes great responsibility, as these devices present a huge growth in our societies' attack surfaces. This rapid growth of connectivity requires security professionals to adapt and learn faster than ever before.

This month's newsletter focuses on the content of the upcoming 11th Annual **Cyber Security Summit**. Below are a series of blog posts that explore the key topics we will be focusing on over the 3-day event. Registration is open, and we hope to see you there!

[Speaker Alert] Pfizer Chairman and CEO Dr. Albert Bourla – State of American Business 2022

U.S. Chamber of Commerce 3 days ago

U.S. Chamber of Commerce

State of American Business 2022

Tuesday | January 11, 2022 | 11 AM ET

Dr. Albert Bourla DVM, Ph.D.
Pfizer
Chairman and CEO

Join the U.S. Chamber of Commerce for **State of American Business 2022** on Tuesday, January 11, 2022 at 11 AM ET.

When COVID-19 brought the world to a standstill, pharmaceutical companies stepped up to the challenge, developed lifesaving treatments and vaccines, and delivered them around the globe. Against remarkable difficulties, their successes have created our strongest tools in beating back this pandemic, demonstrating that through creativity and resilience, businesses can solve some of the world's greatest challenges.

Now is your opportunity to hear from leaders in that effort as Pfizer Chairman and CEO Dr. Albert Bourla joins us for this year's event. Learn how Dr. Bourla and Pfizer are driving innovation, fueling medical breakthroughs, and serving communities.

The program includes keynote remarks from U.S. Chamber President and CEO Suzanne Clark followed by panels featuring leading CEOs, policy experts, and other insightful speakers as they explore the theme ***Competition for the Future***.

WHAT: State of American Business: ***Competition for the Future***

WHEN: Tuesday, January 11, 2022, 11:00 AM ET

U.S. Chamber of Commerce

State of American Business 2022

The challenges, disruptions, and opportunities accelerated by the pandemic are creating a new economic era that American businesses will help define.

This live event will begin at 11:00 AM ET, January 11, 2022.

During this virtual event, we will explore how competition — an essential force that drives achievement, innovation, and progress — helps to shape a better future for all of us.

We will delve into the multi-layered dynamics businesses will confront in 2022.

- Competition for Talent in a Transforming Workforce
- Competition in the Global Economy
- Competition of ideas that will take shape in midterm elections
- And more

Join business leaders from across the country and around the world for this high-level dialogue to equip, inform, and inspire you to take on the challenges and opportunities ahead. Together, we will lead the competition for the future.
